
RARE.

An Update on . . .

THE NEXT GREAT CARCASS SIRE *

RARE.

At Roseda Farm we are quietly breeding Angus cattle . . . no big show winners . . . no big sale averages . . . no hype . . . just an honest, disciplined breeding program. We are developing a line of Angus cattle specifically targeting the improvement of carcass quality and composition. This is not a single trait approach. Our "farm to fork" branded beef program demands that our genetics work for our commercial cow calf partners, through the feedlots and packer, to the retailers and ultimately for the consumer. Our bulls are evaluated through the entire process. We have more than 60 bulls in some phase of our sire evaluation program involving approximately 3000 commercial cows. Look for them in the Angus Sire Summary as the data continues to accumulate.

If you are truly interested in improving the carcass characteristics of your herd, spend some time analyzing these bulls. Look up their pedigrees under pedigree search at *www.angus.org* and visit our web site at *www.roseda.com*. Then select 3 to 4 bulls and do a search of the sire summary for comparable genetics. I think you will find that we are in pretty good company. In addition, you will find that **Roseda bulls have interim carcass EPDs higher than most proven bulls.** This means that you can sample a cross section of our young bulls and on the average produce better carcasses than most proven bulls.

As we did our sire sorting and ran our economic selection indexes, we came to the conclusion that our own Roseda bred bulls were among our best alternatives to the "rare and valuable" carcass sires. As you tour our pastures, you will find the offspring of J037, J062, K006, K046 and K080 with calves on the way from L014, L033, L108 and L142.

You have an open invitation to visit Roseda Farm and see first hand the results of our focused, disciplined breeding program.

Genetic Opportunities:
Semen: $15/straw. Free round-trip shipping on 10+ units. Volume discounts on 100+ units. Ask about our bull testing program.

Bulls, Females and Embryos for sale.
